EDUCATION

MIT Academy of Engineering, Pune

Bachelor of Technology in Computer Engineering

Nov 2022 – Aug 2026

CGPA: 8.29/10

WORK EXPERIENCE

IPride Solutions and Services

Jun 2025 – Jun 2026

Machine Learning Intern

Pune, India

- Built an **AI-powered stock analysis platform** using **NLP**, **LLMs**, and **SQL** for real-time market sentiment analysis, enabling **data-driven investment decisions** with **1.2× higher returns**.
- Developed a **computer vision-based attendance system** automating employee tracking, reducing attendance recording time from **5 minutes to 45 seconds**.
- Built and integrated an **LLM-powered WhatsApp AI assistant** automating banking customer support with intelligent query resolution and personalized interactions.

Ammunition Factory Khadki

Jul 2024 – Aug 2024

Data & Machine Learning Intern

Pune, India

- Built a **YOLO-based visual fault detection system** for automated production line inspection, enabling real-time detection of physical defects and reducing manual quality checks.
- Designed **Power BI dashboards** for sales and performance analytics, providing actionable insights to support data-driven planning and business decisions.
- Assisted in deploying and securing **Maya OS** across **30+ internal systems**, ensuring reliable system configuration and compliance with organizational security standards.

PROJECTS

EdTech Platform with Multi-Agent Career Counseling

Python, Agentic AI, LangGraph, LLMs, RAG

- Built a **multi-agent AI platform** for personalized career counseling using **LLMs and RAG**, enabling context-aware career recommendations through autonomous AI agents.
- Developed autonomous agents for user interaction and career information retrieval, leveraging contextual reasoning to deliver personalized guidance.
- Designed a **web-based interface** with REST APIs, providing seamless access to intelligent career counseling and personalized recommendations.

BrandSnap AI: GenAI for Social Media Content Creation

GenAI, LLMs, NLP, Prompt Engineering

- Built an **AI-powered content generation platform** using **LLMs** to create brand-specific captions and marketing images for social media campaigns.
- Implemented NLP and prompt engineering techniques to generate context-aware, engaging, and brand-aligned marketing content.
- Automated end-to-end content creation workflows, improving marketing efficiency while ensuring consistency across generated assets.

CrayFit: AI Diet Planner [Patent]

Python, Dual-Input ANN, MERN, AWS

- Built an **AI-powered diet planning platform** using **LLMs** and personalized recommendation models, achieving **88% recommendation accuracy**.
- Designed an intelligent recommendation pipeline leveraging **Retrieval-Augmented Generation (RAG)** and health profile embeddings for context-aware diet suggestions.
- Integrated **Mapbox**, **Stripe**, and **Apache Kafka** to enable real-time delivery tracking, secure payment processing, and event-driven communication.

TECHNICAL SKILLS

Languages: C++, Python, SQL

Core Concepts: DSA, System Design, Object-Oriented Programming, Operating Systems, DBMS

AI: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, RAG

Libraries/Frameworks: TensorFlow, PyTorch, OpenCV, Scikit-learn, Pandas, NumPy, LangChain, LangGraph

Databases: MySQL, ChromaDB, Pinecone, Vector Databases

Cloud/DevOps: AWS, Docker, Git, CI/CD Pipelines

Tools: GitHub, Terraform, JIRA, Postman, Hugging Face, OpenAI

ACHIEVEMENTS

- **Datathon 2025 - 2nd runner-up:** Blockchain carbon credit marketplace.
- **Analytics Vidhya Hackathon** Ranked **AIR-64:** Built CLTV prediction model for motor insurance using XGBoost
- **VytoHack- Finalist:** Deep learning-based raga classification using YOLO on spectrogram representations of audio.
