Summary

Final-year Computer Engineering student with experience building data-driven products to solve real-world business problems. Skilled in stakeholder collaboration, data analysis, and translating user needs into scalable solutions. Proven ability to work in cross-functional teams to deliver outcomes that improve efficiency, decision-making, and user experience.

Education

MIT Academy of Engineering, Pune B.Tech in Computer Engineering	2022 – 2026 CGPA: 8.1
Kendriya Vidyalaya, O. F. Varangaon CBSE Class XII	2020 – 2022 81.6%
Orion CBSE School, Jalgaon CBSE Class X	2013 – 2020 90.8%

Core Skills

- **Product & Business Skills:** Stakeholder Collaboration, Product Thinking, Agile & Scrum, Problem Solving
- **Data & Analytics:** MS Excel, Power BI, Tableau, Data Analysis, Data Visualization
- **Technical Foundations:** C++, Python, SQL, Data Structures & Algorithms, DBMS, OOP
- **Tools & Platforms:** JIRA, Git, GitHub, Postman
- **Cloud technologies:** AWS(EC2, S3, VPC), Git, CI/CD

Experience

- Machine Learning Intern, IPride Solutions and Services** 28 June - Present
- Developed an AI stock analysis platform using NLP for real-time sentiment analysis, delivering 1.8× client returns.
 - Developed a face-recognition attendance system, cutting college attendance time from 5 min to 45 sec.
 - Worked in Agile teams using Jira to plan sprints, track progress, and ensure timely delivery of project milestones.
- Frontend Web Development Intern, Ammunition Factory Khadki** 8 Jul - 7 Aug 2024
- Developed user-friendly web interfaces to improve data collection efficiency and enhance user experience.
 - Created Power BI dashboards to analyze sales data and support data-driven business decision-making.
 - Collaborated with cross-functional teams in Agile sprints to define product features and deliver scalable solutions.

Projects

- CrayFit: AI Diet Planner** *Python, Deep Learning, MERN, AWS*
- Developed an AI-based diet planning system using deep learning, achieving 88% accuracy for personalized results.
 - Defined user requirements and built logic for customized 7-day plans based on health data.
 - Improved user engagement by providing tailored health insights.
- Sentiment Analysis using Python** *NLP, Data Analysis, APIs*
- Developed an NLP-based sentiment analysis system with 84% accuracy on financial news data.
 - Generated insights from real-time data to support informed decision-making
- EdTech Platform with Career Counseling Chatbot** *Machine Learning, NLP, Web Development*
- Developed a career counseling platform providing personalized recommendations based on user inputs
 - Focused on improving user experience through intelligent automation and data-driven insights
 - Integrated ML-based intent classification and response generation for automated counseling.

Publications

- AN AI BASED DIET PLANNING SYSTEM FOR INDIVIDUALS** *Published on: 04 July 2025*
IPR Published under Patent Application
Patent Application filed (April 2025), published July 2025 in Biomedical Engineering domain.

Achievements

- **Secured 2nd Runner-up position in Datathon 2025** for developing a blockchain-based carbon credit marketplace.
- **Finalist at VytoHackClash** for developing a deep learning-based raga prediction system using CNN and YOLO.
- **Reached Jury Round at Atos Srijan 2025** for developing GenAI-based solutions for brand campaign content generation.

Leadership

- ASSCET Member** Aug 2023 – Present
Student Association of Computer Engineering
