## Summary

Final-year Computer Engineering student with strong foundations in building AI-driven applications and proficiency in data structures & algorithms. Experienced in developing and deploying machine learning solutions using Python and cloud technologies. Proven ability to solve real-world problems with strong analytical thinking and adaptability to new technologies.

## Education

|                                     |                  |
|-------------------------------------|------------------|
| MIT Academy of Engineering, Pune    | 2022 – 2026      |
| B.Tech in Computer Engineering      | <b>CGPA: 8.1</b> |
| Kendriya Vidyalaya, O. F. Varangaon | 2020 – 2022      |
| CBSE Class XII                      | <b>81.6%</b>     |
| Orion CBSE School, Jalgaon          | 2013 – 2020      |
| CBSE Class X                        | <b>90.8%</b>     |

## Core Technical Skills

- **Languages:** C++, SQL, Python
- **AI:** Machine Learning, Computer Vision, Model Evaluation, NLP
- **Core Computer Science:** Data Structures & Algorithms, OOP, DBMS, Operating Systems (Basics)
- **Data Analytics:** PowerBI, Tableau, MS Excel
- **Cloud/DevOps:** AWS(EC2, S3, VPC, Bedrock, Lambda, CloudWatch), Docker, Git, CI/CD
- **Tools:** Git, GitHub, Terraform, JIRA, Postman

## Experience

- Machine Learning Intern, IPride Solutions and Services** 28 June - Present
- Developed an AI stock analysis platform using NLP for real-time sentiment analysis, delivering 1.8× client returns.
  - Developed a face-recognition attendance system, cutting college attendance time from 5 min to 45 sec.
  - Collaborated with team members in an agile environment to design and deliver scalable solutions.
- Frontend Web Development Intern, Ammunition Factory Khadki** 8 Jul - 7 Aug 2024
- Developed interactive web forms using HTML, CSS, and JavaScript to improve data collection efficiency.
  - Designed and implemented Power BI dashboards for sales analysis to support data-driven decision-making.
  - Assisted in deployment and configuration of Maya OS across 30+ systems, ensuring system security and stability.

## Projects

- CrayFit: AI Diet Planner** *Python, Deep Learning, MERN, AWS*
- Developed an AI-based diet planning system using deep learning, achieving 88% accuracy for personalized results.
  - Implemented logic to generate personalized 7-day meal plans based on user health data.
  - Collected relevant datasets and trained a dual-input deep learning model for personalized diet recommendations.
- Sentiment Analysis using Python** *NLP, Data Analysis, APIs*
- Developed an NLP-based sentiment analysis system with 84% accuracy on financial news data.
  - Processed real-time market data and visualized sentiment trends using Matplotlib.
- EdTech Platform with Career Counseling Chatbot** *Machine Learning, NLP, Web Development*
- Developed an NLP-based chatbot to analyze user inputs and provide personalized career recommendations.
  - Built a web-based interface to deliver personalized recommendations based on user inputs.
  - Integrated ML-based intent classification and response generation for automated counseling.

## Publications

- AN AI BASED DIET PLANNING SYSTEM FOR INDIVIDUALS** *Published on: 04 July 2025*
- IPR Published under Patent Application**
- Patent Application filed (April 2025), published July 2025 in Biomedical Engineering domain.

## Achievements

- **Secured 2nd Runner-up position in Datathon 2025** for developing a blockchain-based carbon credit marketplace.
- **Finalist at VytoHack** for developing a deep learning-based raga prediction system using CNN and YOLO.
- **Reached Jury Round at Atos Srijan 2025** for developing GenAI-based solutions for brand campaign content generation.

## Leadership

- ASSCET Member** Aug 2023 – Present
- Student Association of Computer Engineering
